

Tracker

PORTABLE IRRIGATION MACHINE

Code: UH-T-400

- Offers an economical solution for supplementing seasonal watering needs.
- Ideal for irrigating large areas where an underground system is impractical.
- Tracker requires minimal labour to operate.
- Powered by water, it pulls itself along a nylon cable, dragging up to 110m of heavy-duty hose.
- Tracker can irrigate 2650m² every 8 hours.

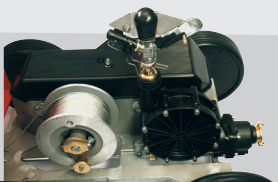

Underhill Exclusive to **david golf**

Specifications

- Weight: 26kgs.
- Size: 838mm L, 558mm W, 558mm H.
- Materials: Aluminium, Brass, ABS.
- Minimum water pressure: 50 PSI.
- Hose required: 1"

Features

- Adjustable speed control: 6-22m/hr.
- Standard full or part circle sprinkler.
- 110m nylon cable provides irrigated length of 122m
- 22-25m pass width.
- Automatic shut-off at end of pass.
- Water turbine drive and gear box.
- Galvanised anchor stake.
- Includes 1" brass quick-connect adapter.

Precision German engineering, high quality components built to last.
